

Erica Carnea 'Erecta'

SYNONYMI:

BESCHRIJVING:

Blomtijd:
Hooft:

= waarschijnlijk x Karl =

BIJZONDERHEDEN:

H.C.C. NO.

R.H.S. COLOUR: ART: NO.

IN MED. IN CULTUUR:

IN ST. WOLD.

The Clintoek schryft hierover in een brief d. d. 29-4-79. "Erecta is indeed a different name, but I think it applied to an *erigena* originally - it is a name of de Gandalle's which in 1840 was said to = *mediterranea erecta*. hort. Angl. It seems to have been used for an *x darleyensis* at least by 1932 (in Kaiser en Siebert's Catalogue - despite the statement in 'The Engl. Weathergarden' p 149. and indeed already by 1929

by Arends, and this name, C.V. has continued to be used on the Continent ever since. I now it have here and it looks as like the latter Arth. Johnson. But its clearly of distinct origin, wherever that have me been. Finally the name has been used for an *erigena* as well in recent years; although I hardly think it will be for the same plant as a century earlier, I have listed it in 1950 and I have notes of four other Continental 202

KEURINGEN RESULTATEN:

uses in the next 10 years, and one in USA in 1960. Verder is er een indicatie
die refereert naar 1783!! I wonder if all these recent uses under erigena don't
refer to the X darl. clone? He zou bly nym met meer onderzoek in deze kwestie
Krusman het deze in h'n laatste editie onder X darl. toegevoegd = mediterranea
Oy geloofd niker dat dit waar is wat betreft de recente ~~gebruiken~~ ^{'Ereola'} uses
Snyge de vroeger gebruiken die oud nym en zo vaag dat he ongelukkegerwyre
over te be understood."
