

*Daboecia Cantabrica* 'Pink Lady'

obtained as mutatic seed 'Bicolor' of 'Barlequin'

Volgens Gates 1905 = 'Donard Pink'

D. Meek in brief 13-5-05: "I think 'Pink Lady' is just a selected form of 'Pink'. I grow it and can see precious little difference.  
I respect Gates, but haven't noticed any difference between that and 'Donard Pink' and 'Pink' is earlier."
