

Daboecia cantabrica. f. *blumii*. 'Doris' ^(8.) Findlater'

D. mel. y.B. 986 "A seedling with the f. blumii characteristic of erect flowers - - -

D. mel. brief 26-9-85: "did you hear that Charles Nelson saw in a garden another f. blumii from Co. Galway with apparently flowers the colour of 'Praegeria', but smaller with a pinched corolla, colour 61 B fading, but quite striking."

D. mel. brief 12-10-85: Dr. Nelson sent me a sample of his f. blumii'

It is a strange thing with small corollas 61 B - 60 A, a deep red, "the vast majority pointing upwards ~~with~~ when collected"

It came from Bog Road, near Roundstone, Co Galway, originally in 1975, where it was collected by Mrs Doris Findlater.

D. mel. brief 23-11-85: Charles Nelson has registered 'Doris Findlater'."
